

The scatter plot displays the error rate (Y-axis, 0 to 1) against time in minutes (X-axis, 0 to 190). The data is categorized by group (red for 'incorrect / changed', green for 'correct / changed') and time period (Thursday 08:35, Thursday 22:11, Friday 03:43). Vertical lines indicate rest periods of 82 minutes. The legend indicates four categories: incorrect / changed (red dots), incorrect / same (red dashed line), correct / changed (green dots), and correct / same (green dashed line). The plot shows a general upward trend in error rate over time, with a significant increase after the 82-minute rest period.
