

The scatter plot displays the performance of a participant on a 50-item test over a 50-minute period. The x-axis represents time in minutes, and the y-axis represents the number of items completed. A vertical blue line at 0 minutes indicates the start time of 05:26. Red dots represent incorrect or changed answers, while green dots represent correct or changed answers. The data shows a steady increase in the number of items completed over time, with a significant jump in the number of correct answers around the 40-minute mark.
