

The scatter plot displays the performance of a participant over time. The x-axis is labeled 'minutes' and ranges from 0 to 130. The y-axis represents the number of answers, ranging from 0 to 100. A vertical blue line at approximately 1 minute marks the time 'Thu 13:59'. The legend indicates that red dots represent 'incorrect / changed' answers and green dots represent 'correct / changed' answers. The data shows a rapid increase in correct answers, reaching a plateau of approximately 80 correct answers by 100 minutes. Incorrect answers are scattered throughout the time period, with a notable cluster of incorrect answers between 30 and 40 minutes.
